PROFESSIONAL SUMMARY

Game Designer and Level Designer with hands-on Unity/C# experience building gameplay loops, combat and exploration systems, and VR/interactive environments. Co-Founder of Nagma, delivering commercial VR projects end to end — from level and interaction design through client-facing builds — including a small XR project showcasing a building's exterior to prospective buyers. Strong systems thinking and comfortable owning a project from concept to playable build.

CORE COMPETENCIES

- Game Design & Level Design (combat, exploration, environmental puzzles, UX flow)
- Gameplay Programming in C# (player controls, state machines, interaction systems, AI/NPC behavior)
- Systems Thinking & Loop-Based Design
- VR/XR Development (Meta/Oculus Quest 2, SteamVR)
- Multiplayer/Networking fundamentals (Photon)
- Cross-platform development: PC, VR, Mobile (mid-range devices)
- Version Control & Collaboration: Git, GitHub, Trello
- Rapid Prototyping & Stakeholder Presentations

TECHNICAL SKILLS

Engines: Unity (advanced); Unreal Engine (academic exposure)

Programming & Systems: C#, Git/GitHub, state machines, physics, animation systems, AI/NPC behavior, UI/UX implementation, scriptable objects

Multiplayer & Platforms: Photon | PC, VR (Meta/Oculus Quest 2), Mobile (mid-range devices)

Art & Tools: 3D Modeling, Substance, Amplify Shader, Adobe Suite

Project Management: Trello, Agile-style iterative development

PROFESSIONAL EXPERIENCE

Co-Founder / Level Designer & Unity Developer | Nagma | 2018 – 2022

Co-founded and led a 3-person studio delivering commercial VR/interactive 3D projects for real estate, construction, and wellness clients, owning design, development, and client presentation.

- **Virtual Real Estate Tours (PC & VR):** Built a real-time interactive 3D VR app recreating a full-scale building from real architectural plans, letting clients explore and reconfigure interior spaces on the fly.
- **The Wave Virtual Experience:** Developed a large-scale VR simulation of a proposed surf complex for real-time exploration pre-construction, used as a stakeholder tool for investment presentations.
- **Interactive Therapy Tool:** Designed a Unity-based interactive system for therapeutic sessions with real-time character/environment manipulation to boost engagement via gamified loops.

PERSONAL PROJECTS

Third-Person Action-Adventure Gameplay System | Independent / Thesis Project | 2020 – 2022

- Designed and developed a fully playable third-person action-adventure game as a final thesis project, implementing combat mechanics, exploration systems, and environmental puzzles across multiple levels using C# (player controls, state machines, level progression).

EDUCATION & LANGUAGES

Degree in Game Design and Programming | Primera Escuela de Arte Multimedial Da Vinci | 2018 – 2022

Languages: Spanish (Native) | English (Bilingual) | Italian (Basic)
